Computer Science graduate specialized in full-stack web and mobile application development using Laravel, React, Flutter, and MySQL. Proven track record in building cross-platform applications, optimizing database queries, and designing robust API integrations. Quick learner, adaptable collaborator, and dedicated software engineer focused on high-performance digital solutions.

EDUCATION

Universitas Muhammadiyah Malang Sep 2022 – Oct 2026

Bachelor of Informatics (Teknik Informatika) — Graduated: Oct 2, 2026

TECHNICAL SKILLS

Mobile Development:	Flutter, Dart, Provider / Bloc State Management, RESTful APIs, Local Caching
Web & Languages:	JavaScript, PHP, React, Laravel, HTML, CSS, C, C#
Databases:	MySQL, Query Optimization, Database Indexing & Normalization
Automation & Tools:	Microsoft Excel (VBA / Macros), Git, GitHub, Figma, Canva

WORKING EXPERIENCES

Fullstack Developer (Internship) — DSM Group (Software House) June 2025 – December 2025

- Developed and maintained robust web applications utilizing Laravel and MySQL, implementing secure CRUD operations, dynamic data processing, and seamless frontend-backend integration.
- Conducted performance debugging and database query profiling to enhance data retrieval speeds and reduce overall server execution latency.
- **Key Impact:** Spearheaded the development of the "di_akad" module, digitalizing comprehensive school administrative workflows across schools in Sidoarjo.

IT Team — Padel Garden Malang August 2025 – September 2025

- Contributed as part of the IT team in developing and deploying a web-based scoring system and player management platform for Padel Garden Malang.
- Handled live website maintenance and real-time troubleshooting during active tournament matches to ensure uninterrupted operation and system reliability.
- Streamlined match scheduling, live score tracking, and participant data administration to ensure smooth tournament execution.

PROJECTS

1. Nusantara Culinary Mobile Platform (Resep Makanan Nusantara) *Flutter & Dart*

Cross-platform mobile application for exploring authentic Indonesian recipes featuring clean architecture with Provider state management, offline local caching, categorized search filters, interactive cooking assistant mode with timers, and REST API backend synchronization with Laravel.

2. Manajemen RT Desa Sedati Agung *Laravel, PHP, MySQL*

Community administration and neighborhood management web portal designed for Desa Sedati Agung to streamline resident data records, financial reporting, and transparent public announcements.

3. Pagedisan Village Information System *Laravel, MySQL, Bootstrap*

Comprehensive village administration portal facilitating resident document requests, population census tracking, and transparent announcement broadcasting.

4. Barbershop Booking & Reservation Website *React, PHP, MySQL*
Interactive reservation platform featuring stylist schedule selection, real-time availability checks, and dual-layer booking conflict prevention mechanics.

5. Meat E-Commerce Platform (Landungsari Market) *Laravel, React, MySQL*
Full-featured retail e-commerce marketplace featuring shopping cart management, secure checkout, order status tracking, and a comprehensive inventory admin dashboard.

6. Laundry Management Website *Laravel, PHP, MySQL*
Digital laundry service management system featuring customer order tracking, laundry status updates, transaction management, and automated receipt generation.

7. Toko Udang E-Commerce & Management Platform (SH Group) *Laravel, PHP, MySQL*
Specialized e-commerce and inventory management platform for SH Group shrimp store featuring product catalog management, order processing, stock tracking, and supplier transaction records.

8. Personal Portfolio & Biodata Website *HTML, CSS, JavaScript*
Interactive personal portfolio website (portofolio-zalman.vercel.app) showcasing professional background, technical skills, and featured software development projects.

CERTIFICATIONS & TRAINING

- **UI/UX Design Training** — PT Digital Solusi Master (14 Juli 2025 – 14 Agustus 2025)
- **Belajar Membuat Front-End Web untuk Pemula** — Dicoding Indonesia (24 Juni 2026)
- **Belajar Dasar Pemrograman Web** — Dicoding Indonesia (25 Juni 2026)
- **Belajar Membuat Aplikasi Web dengan React** — Dicoding Indonesia (29 Juni 2026)
- **Helden 72 - 72-Hour Hackathon** — Helden Inc. (2026)
- **Database Management & Optimization Workshop** / **Sertifikat Kelulusan** — Lab Informatika Universitas Muhammadiyah Malang (2025)

ORGANIZATIONAL EXPERIENCES

Head of Kuliah Kerja Nyata (KKN) Community Service Program Aug – Sep 2024
Directed multidisciplinary community development initiatives, coordinated local government liaisons, and managed digital literacy programs.

Liaison Officer — Pesmaba UMM Sep – Oct 2023
Facilitated communication pipelines and managed event logistics for large-scale university student orientation batches.
